APPLICATION PACKET FOR A TYPE II
RESIDENTIAL
ARCHITECTURAL STANDARDS SUBSTITUTION

GENERAL PURPOSE:
WDO 5.02.02 A. Purpose: The purpose of a Type II Architectural Substitution Permit is to allow substitution to
the architectural standards found in this Ordinance (Section 3.07). Substituted materials or design need to meet
the overall intent of this Ordinance by providing for quality construction, reflect custom design, and result in
equal or greater design quality. A maximum of three substitutions may be considered for each building covered
by an application for substitute standards.

Website: Applications and the Woodburn Development Ordinance are available on the Community
Development Department - Planning website at: www.ci.woodburn.or.us/?q=planning.

REQUIRED SUBMITTALS:
1. One (1) paper copy of the Uniform Application (See Planning website for download).

2. A site plan showing your property boundaries and the location of your existing house or proposed
   house. Four (4) paper copies and one (1) digital copy.

3. Architectural elevation drawings and/or photos showing the architectural substitution(s) requested.
   Four (4) paper copies, with at least one copy in color, and one (1) digital copy.

4. Narrative (written description) explaining how your substitution(s) meet the criteria below. One (1)
   paper copy and one (1) digital copy.
   
   WDO 5.02.02 B. Criteria: The suitability of the substitute architectural standards shall be based on
   consideration of how each substitute standard:
   1. Incorporates design elements and materials that reflect a custom design;
   2. Incorporates materials, that in substance and visual appeal, are of equal or greater quality;
   3. For residential development:
      a. Reflects the character of the existing housing within the subject subdivision and/or
         surrounding area within 250 feet of the subject property;
      b. Ensures that needed housing is not discouraged through unreasonable cost, pursuant to
         ORS 197.307.

(Continued on next page.)
5. Three sets of mailing labels with map depicting a line 250 feet equidistant from all boundaries of the subject property.
   - Avery 5160 format (three columns and ten rows per sheet).
   - The label for each tax lot must include the associated tax lot number.
   - You may consolidate labels to reflect common ownership of multiple tax lots, but only as able to still fit the applicable tax lot numbers within a given label.
   - You may contact a local title company for assistance with label and map preparation.

6. Filing Fee $358.

SUMMARY OF PROCESS FOR TYPE II DECISIONS:
Type II decisions are made by the Director of Economic & Development Services. State law requires that notice of the decision be mailed to surrounding property owners, who may appeal the decision to the City Council. The Council may also choose to review the decision on its own motion. State law gives the City 30 days to determine if the application is complete and another 120 days to finish the decision process (including appeals.) A typical Type II application that is complete upon submittal and is not appealed generally finishes in 4 to 6 weeks.

WDO 3.07 Architectural Design
The purpose of this Section is to set forth the standards and guidelines relating to the architectural design of buildings in Woodburn. Design standards can promote aesthetically pleasing architecture, increase property values, visually integrate neighborhoods, and enhance the quiet enjoyment of private property.

3.07.01 Applicability of Architectural Design Standards and Guidelines
3.07.02 Single Family, Duplexes and Manufactured Dwellings on Individual Lots in Pre-existing Developments
3.07.03 Single Family, Duplexes and Manufactured Dwellings on Individual Lots in New Developments
3.07.04 Single Family and Duplexes in the Neighborhood Conservation Overlay
3.07.05 Standards for Medium Density Residential Buildings
3.07.07 Downtown Development and Conservation Zone

WDO 3.07.01 Applicability of Architectural Design Standards and Guidelines
A. For a Type I review, the criteria of this Section shall be read as “shall” and shall be applied as standards.
   For a Type II or III review, the criteria of this Section shall be read as “should” and shall be applied as guidelines.
B. The following are exempt from the provisions of this Section:
   1. Any single-family, duplex, or manufactured dwelling that existed prior to October, 2005, except such dwellings located within the Neighborhood Conservation Overlay District (NCOD).
   2. New dwellings in Manufactured Dwelling Parks containing more than three acres.
WDO 3.07.02
Single-Family Dwellings, Duplexes and Manufactured Dwellings on Individual Lots in Pre-existing Developments – Architectural Standards and Guidelines

A. Applicability
This Section shall apply to all new single-family dwellings, duplexes and manufactured dwellings on individual lots in subdivisions and Planned Unit Developments, approved on or before August 12, 2013 and in partitions.
Manufactured dwellings have different standards for roofing; otherwise, all standards in this Section applies to manufactured dwellings. The term “dwelling” includes single family, duplexes and manufactured dwellings.

B. Roof Standards
1. Pitch
   Site-built dwellings shall have a minimum roof pitch of 4:12. Manufactured dwellings shall have a minimum roof pitch of 3:12.
2. Material
   Roofing material shall be composition shingles, clay or concrete tile, metal, cedar shingles or shakes. Composition shingles shall be architectural style, with a certified performance of at least 25 years.
3. Eaves
   Eaves of a dwelling unit or garage shall provide a minimum 12-inch projection.

C. Exterior Finish
The exterior finish of a dwelling shall have the appearance of either horizontal or vertical lap siding, shakes, batt and board, stone, shingles, brick or stucco. Where horizontal lap siding is used, it shall appear to have a reveal of three to eight inches. Plain concrete, corrugated metal, plywood and press board shall not be used as exterior finish material.

D. Garage
1. Single-family dwellings, duplexes, and manufactured dwellings shall have a garage.
2. The facade containing the vehicular entrance for an attached garage shall either:
   a. Face away from the street frontage of the main pedestrian entry of the dwelling, at an angle of at least 90 degrees, or
   b. Comprise less than half the lateral dimension of the total facade facing a street, or
   c. Comprise no more than 65 percent of the total facade of the structure facing the street, including second stories, dormers, and eyebrows.

(Continued on next page.)
3. The facade containing the vehicular entrance for a detached garage shall either:
   a. Face away from the street frontage of the main pedestrian entrance of the dwelling, at an angle of at least 90 degrees, or
   b. Set back at least 20 feet beyond the facade containing the main pedestrian entrance.
   c. The area of the facade of the garage shall be no greater than of the facade of the dwelling.

E. Main Pedestrian Entrance
1. The main pedestrian entrance of each dwelling, excluding dwellings on flag lots and manufactured dwellings, shall face the street.
2. The main entrance to each dwelling shall have either:
   a. A covered porch, at least 48 square feet in area, with a minimum dimension of six feet on at least one side; or
   b. A recessed entry, at least 24 square feet in area, with a minimum dimension of four feet on at least one side.

F. At least 15 percent of the facade wall surface of a dwelling facing a front lot line shall be windows, excluding roofs and non-habitable wall area under the end of a roof, and excluding the garage.

G. The front of the dwelling shall either contain:
1. An articulated roof line, incorporating more than one pitch or elevation of the ridge line that is visible in the front elevation, excluding a porch; or
2. A gable, dormer, eyebrow, off-set roof line or other vertical, architectural extension of the building at least 36 inches above the eave; or
3. An off-set line in the facade of the building of at least 36 inches and ten feet in length, excluding a recessed pedestrian entrance or porch.
WDO 3.07.03
Single-Family Dwellings, Duplexes and Manufactured Dwellings on Individual Lots in New Developments – Architectural Standards and Guidelines

A. This Section shall apply to all new single-family dwellings, duplexes and manufactured dwellings on individual lots in subdivisions and Planned Unit Developments approved after [the date of adoption of this Section].

B. Plain concrete, corrugated metal, plywood, T-111, oriented strand board (OSB), and sheet press board shall not be used as exterior finish material.

C. Dwellings shall have at least nine of the following design features:
   1. Site-built dwellings shall have a minimum roof pitch of 4:12. Manufactured dwellings shall have a minimum roof pitch of 3:12.
   2. Roofing material shall be composition shingles, clay or concrete tile, metal, cedar shingles or shakes. Composition shingles shall be architectural style, with a certified performance of at least 25 years.
   3. Eaves of a dwelling unit or garage shall provide a minimum 12 inch projection.
   4. The exterior finish shall have the appearance of either horizontal lap siding, shakes, shingles, stone, brick or stucco. Where horizontal lap siding is used, it shall appear to have a reveal of 3 to 8 inches.
   5. The facade containing the vehicular entrance for a garage shall face away from the street frontage of the main pedestrian entry of the dwelling, at an angle of at least 90 degrees.
   6. The facade containing the vehicular entrance for an attached garage shall comprise less than half the lateral dimension of the total facade facing a street, or shall comprise no more than 65 percent of the area, including second stories, dormers, and eyebrows, of the total facade of the structure facing the street.
   7. The facade containing the vehicular entrance for a detached garage shall be set back at least 20 feet from the facade of the dwelling containing the main pedestrian entrance, and with the area of the facade of the garage no greater than that of the dwelling.
   8. The main entrance to each dwelling shall have either:
      a. A covered porch at least 48 square feet in area, with the minimum dimension of six feet on at least one side; or
      b. A recessed entry at least 24 square feet in area, with the minimum dimension of four feet on at least one side.
   9. At least 15 percent of the facade wall surface of a dwelling unit facing a front lot line shall be windows, excluding roofs and non-habitable wall area under the end of a roof, and excluding the garage facade.
   10. The front of the dwelling shall contain an articulated roof line incorporating more than one pitch or elevation of the ridge line that is visible in the front elevation, excluding a porch.
   11. The front of the dwelling shall contain a gable, dormer, eyebrow, off-set roof line or other vertical, architectural extension of the building, at least 36 inches above the eave.
   12. The front of the dwelling shall contain a horizontal offset of at least 36 inches in depth and ten feet in length, excluding a recessed pedestrian entrance, porch, or garage that projects in front of the dwelling.

D. Single-family dwellings, duplexes, and manufactured dwellings shall have a garage.
WDO 3.07.04
Single-Family Dwellings and Duplexes in the Neighborhood Conservation Overlay District (NCOD) – Architectural Standards and Guidelines

A. Applicability
1. For any new single-family dwelling, duplex, or accessory structure within the Neighborhood Conservation Overlay (NCOD), all facades shall be subject to architectural review.
2. The exterior remodel to single family dwellings, duplexes, and accessory structures shall be subject to architectural review.
3. At the time of application, the applicant shall choose whether the Design Review shall be conducted as a Type I, II, or III review (Section 5.01, 5.02, 5.03), depending on floor area. For a Type I review, the criteria of this Section shall be read as “shall” and shall be applied as standards. For a Type II or III review, the criteria of this Section shall be read as “should” and shall be applied as guidelines.

B. Design Guidelines and Standards
1. The proposed construction should/shall provide architectural details, such as dormers, bays, bracketing, cornices and trim, to add aesthetic visual interest and detail.
2. The design should/shall minimize the negative visual impact of on-site automobile parking within the district by orienting garage openings so that they do not front directly onto a public street. An attached garage opening should either be located a minimum of 10 feet back from the building facade or the garage should be detached.
3. Long, flat facades on buildings should/shall be avoided. Buildings should/shall not be more than 50 feet wide.
4. The character of single-family and duplex roofs shall be maintained. The roof pitch should/shall be a minimum of 6:12.
5. The main entrance of a dwelling should/shall face the street and be covered with a roof.
6. Windows in the building should/shall be wood sash with trim that is at least 5½ inches wide. No pane of glass should/shall be any larger than 30 inches wide by 84 inches high. Glass should/shall be clear or stained.
7. Horizontal wood siding, brick or stucco should/shall be used for exterior finishes. For building additions, the exterior finish should/shall be of the same style and character as the existing building.
WDO 3.07.05
Standards for Medium Density Residential Buildings – Architectural Standards and Guidelines

Note: A medium density residential building is any building where the predominant use is multiple-family dwelling, nursing care or group care facility.

A. At the time of application, the applicant shall choose whether the Design Review shall be conducted as a Type I, II, or III review (Section 5.01, 5.02, 5.03). For a Type I review, the criteria of this Section shall be read as “shall” and shall be applied as standards. For a Type II or III review, the criteria of this Section shall be read as “should” and shall be applied as guidelines.

B. Open Space
   1. Private Open Space
      a. Ground Level Courtyard
         (1) Units within five feet of the finished grade, should/shall have at least 96 square feet of private open space, with no dimension less than six feet.
         (2) Ground level private open space should/shall be visually and physically separated from common open space, through the use of perimeter landscaping or fencing.
      b. Balcony
         Units more than 5 feet from the finished grade should/shall have at least 48 square feet of private open space in a balcony, with no dimension less than six feet.
   2. Common Open Space and Facilities
      a. Common open space and facilities consist of the site area and facilities not devoted to dwellings, parking, streets, driveways or storage areas that are available for use by all residents of a development.
      b. Required yard setbacks should/shall be included as common open space.
      c. Open Space and Facility Design Guidelines and Standards.
         (1) A minimum of 30 percent of the net site area of each medium density residential development should/shall be permanently designated for use as common open space and facilities.
         (2) The common area should/shall include at least one open space containing 2,000 square feet, with a minimum width of 36 feet.
         (3) Facilities to accommodate children’s or adult’s recreation, meeting or education activities should/shall be provided at a ratio of 36 square feet of outdoor, or 12 square feet of indoor, common area per dwelling unit or living unit. The minimum improved common area for this purpose should/shall be 720 square feet of outdoor or 240 square feet of indoor space. The space for such improvements may be counted as part of the common area required by Section 3.07.05.B.1.c.2 at a 1:1 ratio for outdoor space and 3:1 ratio for indoor space.

C. Architectural Design Guidelines and Standards
   1. Building Mass and Facade
      a. Buildings should/shall have no dimension greater than 150 feet.
      b. Every two attached dwelling or living units should/shall be offset by at least four feet in depth.
      c. Individual buildings located within 28 feet of a property line should/shall have a varied setback at least four feet.
      d. A flat roof, or the ridge of a sloping roof, should/shall not exceed a horizontal length of 100 feet without providing a difference in elevation of at least four feet.
e. Buildings should/shall incorporate a porch or recessed entry for each ground-level dwelling or living unit. Covered porches and entries should be at least 30 square feet, with no dimension less than six feet. This provision does not apply to buildings for residential care.

f. All habitable rooms, except bathrooms, facing a required front yard should/shall incorporate windows.

g. Staircases providing access above the first floor level should/shall not be visible from a street.

2. Building Materials, Texture and Color
   a. The exterior finish for at least 90 percent of the facade should/shall be:
      (1) Either siding, brick or stucco. Plain concrete, corrugated metal, plywood and sheet press board should/shall not be used as exterior finish material; and
      (2) Either white, tinted with a minimum of 10 parts per 100 of white, or shaded with a minimum of 10 parts per 100 of black or brown. Shading colors with brown or black to create earth tones or tinting colors with white to soften the appearance.
      (3) Fluorescent, “day-glo,” or any similar bright color shall not be used on the facade.

   b. The roofing material should/shall be either composition shingles; clay or concrete tile; metal; or cedar shingles or shakes. Composition shingles should/shall be architectural style, with a certified performance of at least 25 years.

3. Pedestrian Circulation
   a. The internal pedestrian system in medium density residential developments should/shall connect to other areas of the site, to other building entrances and to adjacent streets.
   b. When a residential building is sited within 24 feet of a street right-of-way, the building should/shall contain entrances directly accessible from the street.
WDO 3.07.07
Downtown Development and Conservation (DDC) Zone – Architectural Standards and Guidelines

A. Applicability
The purpose of these development standards is to guide the design of buildings constructed in the Downtown Development and Conservation (DDC) zoning district to ensure that, through appropriate use of facades, windows, building orientation, and architectural details, new structures and alterations of existing structures are physically and visually compatible with other buildings within the downtown business district. The majority of the existing buildings in downtown Woodburn reflect architectural styles that were popular during the late nineteenth and early twentieth century.

1. The provisions of this ordinance shall apply to the following activities within the DDC:
   a. All new building construction;
   b. New construction, restorations, and remolds. Restorations shall be defined as all exterior repairs, replacement of materials, alterations or changes, including reroofing, painting, window, and sign replacement, as well as any exterior building or site modification that requires a building permit;
   c. All new signage.

2. This ordinance shall not apply to the following activities or uses:
   a. Maintenance of the exterior of an existing structure, such as reroofing, residing, or repainting where similar materials and colors are used that comply with this ordinance;
   b. Interior remodeling;
   c. Single-family detached dwellings;
   d. Single-family dwellings that are used for businesses or home occupations.

3. This ordinance shall apply only to those portions of a building or sign that are proposed for construction or modification, and shall not extend to other elements of the building or sign that may be out of compliance with the requirements of this ordinance (i.e., a permit to replace a single window shall not require that all other windows on the building that may be out of compliance with this ordinance to be replaced, unless such action is initiated by the property owner). However, if a building should be destroyed due to fire, accident, or an act of God, the new or replacement structure shall be rebuilt to conform to the requirements of this ordinance.

4. At the time of application, the applicant shall choose whether the Design Review shall be conducted as a Type I, II, or III review (Section 5.01, 5.02, 5.03). For a Type I review, the criteria of this Section shall be read as “shall” and shall be applied as standards. For a Type II or III review, the criteria of this Section shall be read as “should” and shall be applied as guidelines.

B. Design Guidelines or Standards
Standards for new construction shall require builders to conform to the architectural form of Woodburn’s historic period (1880’s through 1940’s). As such, new construction shall conform to the following standards listed below. The following list of buildings is provided as a reference guide to those buildings which display characteristics intended by the standards.

- Association Building on Front Street between Garfield and Hayes Streets
- Fulmer Building at Front and Lincoln Streets
- Old City Hall at First and Lincoln Streets
• Carnegie Library at Second and Garfield Streets
• Bank of Woodburn building at Front and Arthur Streets
• Masonic building at Front and Arthur Streets

1. Site Development
   a. Building fronts and entrances shall be oriented toward the street. Buildings with frontages on two or more streets shall be oriented to at least one street.
   b. Building facades should be set at the property edge along the sidewalk. Buildings with frontages on 2 or more streets should be set at the property edge on at least one street.

2. Building Scale
   a. The overall size and proportion of new structures shall be compatible with the scale of nearby traditional storefront buildings constructed during the historic period. This standard may be met by either designing the building’s size and proportions to be similar to comparable historic structures in the downtown, or by the design of the facade so that it breaks a larger mass into smaller units that are similar to comparable historic structures.
   b. If practical, new buildings should have the same floor height as adjoining buildings in case there is ever a desire to link the storefronts.
   c. The relationship between the height and width of the main facade of the building shall be visibly compatible with adjoining or nearby buildings of the historic period or style. This standard may be met through either similar height and width, or, through design elements that provide visual continuity with adjoining or nearby buildings of the historic period.

3. Building Height
   New buildings of at least two stories in height are encouraged.

4. Building Width
   a. All new buildings should maximize lot frontage as much as is practicable.
   b. New buildings whose street frontage is more than 50 feet wide shall be designed to convey a sense of division through the use of pilasters, windows and door openings, recessed entries, off-sets or other architectural details.

5. Storefronts
   a. Primary entrances shall be oriented to the street. Corner buildings shall have corner entrances, or shall provide at least one entrance within 20 feet of the street corner or a corner plaza.
   b. The upper windows of multi-story buildings shall use multi-pane double-hung sash windows or the equivalent style.
   c. The relationship between solid walls and window and door openings on the main facade shall be visually compatible with adjoining or nearby structures from the historic period or style. Ideally, first floor storefronts should be about 80 percent glass from approximately two feet above grade to approximately 10 feet above grade.
   d. The relationship of width and height of window and door openings shall be visually compatible with adjoining or nearby buildings from the historic period or style.
   e. Blank walls, walls without window or door openings, are not permitted along public streets.
   f. Windows and doorways shall not be covered over with paper, boards, or cardboard except during times of construction or remodeling and shall be limited to a period of 120 days, unless an
extension is otherwise granted by the Director.

g. Doors shall match the materials, design, and character of the display window framing.
h. Architectural features such as awnings, windows, cornices, etc., shall be provided at the second floor to differentiate the storefront from the upper levels of the building, to add visual interest, and to allow the storefront to function as the base for the rest of the building.

6. Facade Materials and Texture
   a. The materials and texture of the facade shall be compatible with those on buildings constructed during the historic period.
   b. Permitted exterior facade materials include: brick, cast iron, relatively narrow horizontal wood or masonry siding, and stucco. Plywood siding, T-111, and vertical board and batten are prohibited.
   c. Exposed concrete block facades facing the street are not allowed. Split-face or scored-face block may be used in small quantities for foundations or other non-dominant features.
   d. All main facade materials shall be painted (except brick, for which painting is optional).
   e. Metal siding shall not be used as a building material on the facade facing a street.

7. Windows
   a. Windows which allow views to the interior activity or display areas are encouraged. Windows shall include sills at the bottom and pediments at the top. Glass curtain walls, reflective glass, and painted or darkly tinted glass shall not be used on the first floor.
   b. Ground Floor Windows
      (1) All new buildings must provide ground floor windows along adjacent street rights-of-way.
      (2) Required window areas must be either windows that allow views into working areas or lobbies, pedestrian entrances, or display windows.
      (3) Required windows must have a sill no more than four feet above grade. Where interior floor levels prohibit such placement, the sill must be raised to allow it to be no more than two feet above the finished floor level, up to a maximum sill height of six feet above grade.
      (4) Glass curtain windows are not permitted.
      (5) Darkly tinted windows and mirrored windows that block two-way visibility are prohibited as ground floor windows along street facades.
      (6) Any wall that faces a public right-of-way must contain at least 20% of the ground floor wall area in display areas, windows, or doorways. Blank walls are prohibited.
   c. Upper Floor Window Standards
      (1) Glass area dimensions shall not exceed five feet by seven feet. (The longest dimension may be taken either horizontally or vertically.)
      (2) Windows must have trim or molding at least two inches wide around their perimeters.
      (3) At least half of all the window area in upper floors must be made up of glass panes with dimensions no greater than two feet by three feet.

8. Roofs
   a. Main facade roofs (lower than a 6:12 pitch) shall be concealed behind a square or stepped parapet. Flat roofs are permitted behind a parapet.
   b. All heating, ventilation, and air conditioning (HVAC) systems located on top of a roof shall be located or screened so that they are not visible from the street. Dish-style antennas shall be located or screened so that they are not visible from the street. All screening material shall be natural and shall be compatible with the facade of the front of the building.
c. New roofs on existing buildings, or on additions to existing buildings, shall match the pitch and form of the original roof.
d. Shed roofs are permitted on one-story rear additions.
e. Back-lit or internally illuminated roofs are prohibited.

9. Awnings and Canopies
   a. The use of awnings or canopies over sidewalks is encouraged.
   b. Awnings shall extend out from the building front to cover at least two-thirds of the sidewalk, unless it is shown that such a distance will interfere with existing trees, poles, etc., to provide pedestrian protection from the elements.
   c. Awnings shall be flat or sloping. Awnings shall be made of metal, wood, canvas or similar materials. Rounded bubble or plastic awnings are prohibited. Fully glazed awnings are not permitted.
   d. Awnings shall fit within the window bays (either above the main glass or the transom light) so as not to obscure or distract from significant architectural features.
   e. The color of the awning shall be compatible with its attached building.
   f. Awnings shall not be internally illuminated. However, lighting which is intended to provide illumination to the sidewalk and signage is permitted.
   g. Awnings shall be a minimum of eight feet above the sidewalk.
h. Where feasible, awnings shall be placed at the same height as those on adjacent buildings in order to maintain a consistent horizontal rhythm along the street front.

10. Color
   a. The painting of brick walls is permitted.
   b. Subtle or subdued tones commonly used during the historic period shall be used. Bright or neon colors are prohibited.
   c. Different colors shall be used to accentuate and highlight trim, windows, and other building features.

11. Site Design
    Landscaping shall not obliterate street and sidewalk views of signage or architectural features on historic buildings.

12. Off-Street Parking
    a. All parking and access standards of this ordinance (Sections 3.04 and 3.05) shall apply, except that there shall be no required parking in the Downtown Development and Conservation (DDC) zone.
    b. Parking areas shall not be located between the front of the building and the street.
    c. Parking areas with more than 10 spaces shall be divided by landscaped areas or walkways, or by a building or group of buildings.
    d. Knee walls are required to screen street side parking lots. Knee walls shall not exceed three feet in height and shall be constructed with masonry. Alternatively, a combination of a wall or fence and landscaping may be approved if they provide an effective buffer and low-level screen of the parking area.

C. External Storage of Merchandise
   The external storage of merchandise or materials, directly or indirectly related to a business, is prohibited.
D. Outdoor Displays of Merchandise
   Outdoor displays of merchandise are permitted during business hours only and shall not exceed ten percent of the total retail sales area. Displays of merchandise on public sidewalks may not reduce usable walking area widths to less than four feet.

E. Outdoor Eating Areas
   Outdoor dining areas are encouraged, and are permitted on public sidewalks. Outdoor food vending carts are permitted. Eating areas or vending carts may not reduce usable walking area widths on public sidewalks to less than four feet. Mobile food kitchens are prohibited in the DDC district.
